

CALL FOR ABSTRACTS

With the goal of fostering scientific synergy and encouraging cross-project partnerships to achieve unmet scientific priorities, MeDOC is calling on all members to submit abstracts on projects related to MeDOC Consortium goals. Four Jr. Investigators/Trainees (one from each of the non-host U01 sites) will be selected to receive a travel award for the March 2025 meeting!

Criteria for Abstracts

- Topics must be relevant to metabolic dysregulation or obesity related cancer risk.

MeDOC Consortium Goals

- Understand the mechanisms of obesity-related metabolic dysregulation and cancer risk
- Characterize signal cross-talk between key biologic processes
- Develop common measures and methods to support collaborative projects and to advance the field
- Determine the utility of emerging approaches to identify targets for potential intervention
- Translate mouse model data to human studies
- Develop outreach efforts that can translate evidence into policies that mitigate health disparities

Collaborative Projects are encouraged to submit abstracts

Important Dates

Sep 17	Call For Abstracts
Dec 20	Abstract Materials Due
Jan 16	SC Review
Jan 17	Abstract Acceptance with Travel Awards Announced
